

JOJ Instructions

VE281 - Data Structures and Algorithms, Xiaofeng Gao, Autumn 2019

In this file, we will show you some basic information about how you can upload your Lab works on JOJ system and some submission guidance.

Pack the source code into tar package

JOJ accepts tar, zip and rar package when you are submitting the lab works. If you are packing the source codes into tar package, you may find the following command helpful.

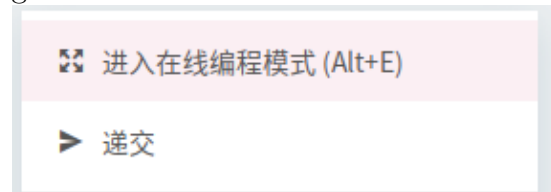

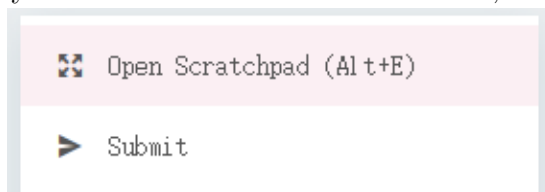

```
tar -cf ./Lab03.tar *.cpp *.h Makefile
```

Claim and submit

Before you submit, you first need to claim the homework, shown in the figure below.

Then you can click on the submit button, like the figures below.

Select your package and submit.

More tips about reports

If the lab work requires about a report, it should contain the following elements.

1. Comparison of the performances of the different. For more detailed information you should refer to the Lab work file.
2. A discussion or conclusion section for the comparison. There is no need for very specific and detailed mathematical analysis. Brief explanations would be good.
3. Codes in attachment.
